Creating Jobs and Change in Haiti: Super Charged by my Archbishop Murray Education

Haiti is a very needy, complex place where idealistic programs frequently fail. What are the ingredients of success?

Featuring AMM Alumna Pat Barrett Wolff '65

Patricia B. Wolff, MD is the Founder and current Senior Advisor of Meds & Food for Kids (MFK), a social benefit non-profit enterprise dedicated to preventing and treating malnutrition in Haiti. MFK produces Ready-to-Use Therapeutic Food, called Medika Mamba, which translates to "peanut butter medicine" in Haitian Creole. She will bring samples of this product to the event. MFK works exclusively in Haiti, employing Haitians and when possible, using locally-sourced raw materials,

has saved the lives of almost 600,000 children. MFK also addresses some of the root causes of malnutrition – unemployment and poverty by creating jobs, mentoring professionals and supporting long-term agricultural education and development.

Dr. Wolff received her B.A. and M.D. degrees at the University of Minnesota, and after an internship, worked for the Indian Health Service in South Dakota. Following a residency and endocrine fellowship at Washington

University School of Medicine, she worked as a pediatrician in the St. Louis area for 35 years. In 1996, she became President of Forest Park Pediatrics, P.C. She is Professor Emerita of Clinical Pediatrics at Washington University School of Medicine, and has been listed in the U.S. News & World Report of Best Doctors every year since 2002. She now serves on the Board of Directors and as a Senior Advisor to the organization.

All alumni, students, current and past parents, grandparents and staff are invited to join us!
